

## ADS® Qstart™XML Installation Guide

### Verify the Minimum Hardware and Software Requirements

**Supported Operating Systems:** QstartXML runs on Microsoft® Windows® 10 or higher operating systems.

**Microsoft .NET Framework:** Your system must have Microsoft .NET Framework version 4.5.2 to run QstartXML. If you do not have the proper version of this utility installed on your computer, it will be installed/updated automatically during the QstartXML installation process. However, this can significantly increase the time required for installation. Therefore, consider installing or updating to version 4.5.2 prior to installing QstartXML to expedite the installation process.

**Profile® Software Users:** QstartXML can run on computers with or without Profile. However, Profile users must have Profile version 3.6 to ensure optimal support and compatibility between both applications. Install Profile 3.6 first, then install QstartXML.

**Supported Flow Monitors and Rain Gauges:** QstartXML supports ADS ECHO™, ADS RainAlert®III™ and ADS TRITON+® monitors. TRITON+ monitors must be upgraded to firmware version 6.40 (or newer) to be compatible with QstartXML. Updated firmware can be downloaded from the ADS website at [www.adsenv.com/software-downloads](http://www.adsenv.com/software-downloads). Once you receive the new firmware, you may perform the upgrade through QstartXML.

### Remove the Existing Version of QstartXML (when applicable)

If you currently have QstartXML on your system, you must remove it through the Windows Control Panel before installing a new version of QstartXML.

### Download and Install the Current Version of QstartXML

Download QstartXML in the following way:

1. Go to [www.adsenv.com/software-downloads](http://www.adsenv.com/software-downloads) and select QstartXML in the ADS Software section.
2. Click on the QstartXML link.
3. Select **Save** and **Open Folder**.
4. Using WinZip®, or an equivalent program, extract the files; selecting User folder names.
5. Browse to the folder where the QstartXML files were downloaded and double-click the **setup.exe** file.
6. QstartXML will now be installed on your computer.

### Launching QstartXML

Launch the QstartXML utility by double-clicking the  icon located on your desktop.
